AI & ROBOTICS LABS

AI & ROBOTICS | LABS & PROGRAMS FOR INSTITUTIONS

Where Young Minds Build the Future.

End-to-end AI & Robotics Labs for schools, colleges and universities.

3D Printing | Robotics | Drones | Electronics | Smart Classrooms

INCLUDES A FULLY SPONSORED AI & ROBOTICS LAB

ZERO COST TO THE SCHOOL | Only a vacant classroom required

III - XII	64 Hrs	10	NSDC
Learning levels	Program hours	Future skills	Certification

BOOK A FREE DEMO

PROGRAMS & PATHWAYS

AI, Robotics and 8 more future skills

Ten technologies, three learning pathways

Our Programs

- **AI** — Artificial Intelligence
- **</>** — Coding & Programming
- **BOT** — Robotics & Automation
- **IoT** — Internet of Things
- **CV** — Computer Vision
- **3D** — 3D Design & Printing
- **UAV** — Drone Technology
- **XR** — AR – VR – XR
- **DS** — Data Science
- **DT** — Design Thinking

Learning Pathways

Classroom + hands-on + LMS learning at every level.

School Program

Std. III - X

64

Hours

- 50 Hrs Classroom + 10 Hrs LMS
- Foundation AI, Robotics & Coding
- Computational Thinking & Innovation

Senior Secondary

Std. XI - XII

64

Hours

- 50 Hrs Classroom + 10 Hrs LMS
- Python, ML Fundamentals & Robotics
- Industry Projects & NSDC Certificate

All pathways include teacher training, LMS access and continuous academic support.

EdUtech International
Shaping Global Minds

INSIDE THE LAB

A fully equipped AI & Robotics Lab

Software, hardware and tools students use every day

AI Tools Provided

Claude AI Pro

Research, reasoning, writing and coding.

Canva Pro

Presentations, graphics and learning materials.

OpenArt

AI image and video generation.

Google Workspace

Docs, presentations, storage and collaboration.

Robotics, Drone & Fabrication

Bambu Lab A1 Combo 3D Printer

3D printing for prototypes, functional parts and custom enclosures.

Quad Copter Drone Kit

Flight controller, ESCs, motors, battery, transmitter and receiver.

Soldering Iron Kits

Soldering iron, solder wire, paste and desoldering pump.

Tool Kits

Wire strippers, crimpers and precision screwdriver sets.

Testing & Measurement

Rigol DS1054Z Oscilloscope, 50 MHz

Measure and view sensor output waveforms.

Wanptek WPS3010H DC Power Supply

Adjustable power for circuit testing and debugging.

Lab Infrastructure & Computing

Desktop Computers

Programming, 3D design, AI and research.

65-inch Smart Board

Classroom teaching and demonstrations.

OUTCOMES & CERTIFICATION

What students take home

- **Real projects**
  A project portfolio built through hands-on learning.
- **Certificates**
  NSDC certifications for eligible programs, plus a completion certificate.
- **Future skills**
  AI, coding, robotics, IoT and more, from Std. III to higher education.
- **Confidence**
  Students and teachers who can lead and build with technology.

How We Implement

1. **Lab Design**
   Lab planned and set up for your institution
2. **Curriculum**
   NEP 2020 aligned, with LMS access
3. **Teacher Training**
   Capacity building from scratch
4. **Classroom Delivery**
   Hands-on, project-based sessions
5. **Certification & Support**
   NSDC certificates, year-round help

Quick answers

What is included in the AI Lab?
Computer infrastructure, educational AI robots, AI software and platforms, robotics and STEM kits, and LMS access, configured to your institution.

Do teachers need prior AI knowledge?
No. Our Teacher Capacity Building program equips educators with everything they need from scratch.

How is the program implemented?
We handle it end to end: lab design, curriculum, teacher training and continuous academic and technical support.

Ready to build your institution's AI & Robotics Lab?

Book a demo and we will respond within 24 hours.
